# *Introduction to the Data Use Process* Course Now Available!

October 2020

Course Description

Welcome to the Michigan Department of Education Office of Special Education's *Introduction to the Data Use Process*, also known as the Student Outcomes Data Analysis, or SODA. This quality data use process is an 8-step process to walk you through the review and analysis of data and the use of this information to select strategies to achieve your goals. This course was developed to be flexible in its use, as both a stand-alone, self-paced course and as a supplement to in-person or blended learning opportunities. SCECHs: 1.0

Accessing the Course

To access the course, go to Michigan Virtual's website (https://michiganvirtual.org/login) and click on Professional Learning Portal. Setting up an account is **free** and so are many of the courses, **like this one!**
